520 CEN/5 Features

Some of the features that make our Model 520/5 a better machine.

520 CEN/5

5/8 inch diameter head mounting bolts

Table 3 1/8 inches thick

Parts and service for all 520 CNC's made

We have mechanical parts and service for all of our CNC machines made and have CNC boards on the shelf for machines made in the 1970's with on site service available for them

5 hp Baldor Vector drive system

Our spindle drive uses a Gates polychain. Using this with the vector drive virtually eliminates mechanical maintenance as there are no gears or pulleys to wear out.

Quality cast iron poured in the USA

Precision ground 1.25" diameter

ballscrews mounted with 2.44" diameter heavy duty angular contact bearings designed for ballscrews

10 spline 1.25" dia spindle shaft mounted on 2 pair of precision angular contact bearings

Competition

1/2 inch diameter

2 3/4 inches ?

??????

Most imports change so often parts are not available 7 yrs later
